Social Media Responsibility and Digital Footprint: Protecting Kids Against High-Tech Troubles

Dr. Kim Mason

- 94% of teens ages 12-17 go online — Online
- 75% own cell phones — Cell Phones
- 73% use a social networking site — Social Networks
- 72% are texting — Texting
- 97% are playing video games — Gaming

Pew Internet & American Life 2010

Youth's Online Life

How Much Time Kids Spend Online?

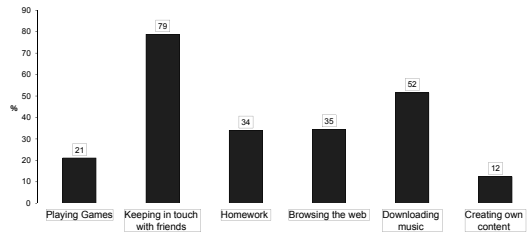
Do You know...

- 8-18 year-olds devote an average of 7 hours and 38 minutes (up from 6:21) to using entertainment media across a typical day (more than 53 hours a week)
- Media multitasking-they jam about 10 hours and 45 minutes worth of media content into those 7½ hours.
- About half (47%) of heavy media users say they usually get fair or poor grades (mostly Cs or lower), compared to about a quarter (23%) of light users.

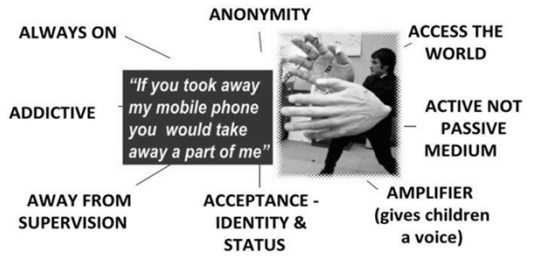
Online Includes . .

Cell Phones | Laptops | Gaming Devices | Tablets

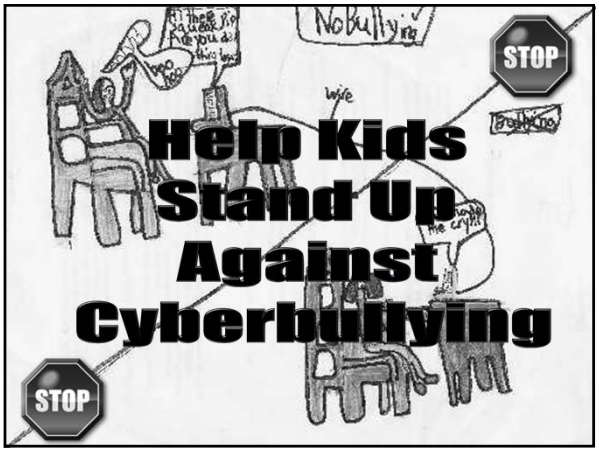
What's important to you in your digital world?*



The Importance of Technology for Youth



THE ONLINE WORLD IS THE CHILD'S WORLD !



Cyberbullying is . .

- Aggressive Behavior
  - Verbal
  - Psychological
- Carried Out
  - Repeatedly and Over Time
- Imbalance of Power
  - Techie-Uses Technology
  - Psychological Control
- Behavior is Intended to Harm or Disturb
- Direct Bullying
  - Directly sends a message to other
- Indirect Bullying
  - cyberbullying by proxy by using others to help cyberbully a victim, with or without the accomplice's consent

Human Relationships

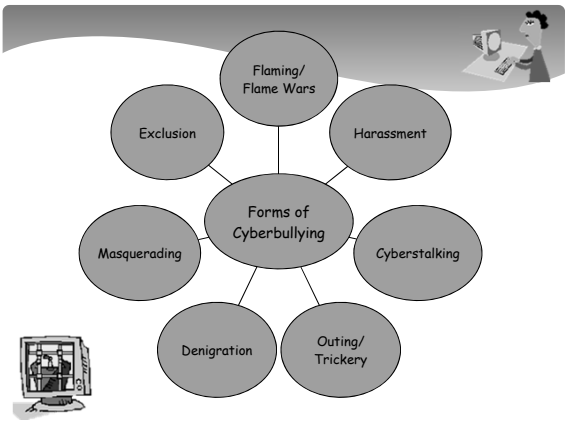
Would u say this 2 her ☺?

Differences Between F2F & Cyberbullying

Bullying	Cyber Bullying
Direct	Anonymous
On Campus	Anywhere
Lot of energy and courage	Not so much
Mostly verbal and physical	Multimedia
Poor relationships with teachers	Good relationship with teachers
Fear retribution	Fear loss of technology
Requires strength	Requires skills & knowledge

Cyberbully Roles (cont)

- **Targets**
  - Targets of entitlement bullies: individuals who get picked on because bullies think they are different or inferior.
    - Example: Inadvertent Cyberbullies
  - Victims of retaliators: Usually individuals who have been cyberbullying, but are now receiving the cruelty



Cyberbully Roles (cont)

- **Bystanders**
  - Bystanders who are part of the problem
    - Individuals who encourage and support the bully or who watch the bullying from the sidelines but do nothing to help the victim.
  - Bystanders who are part of the solution
    - Individuals who seek to stop the bullying, protest it, and provide support to the victim.

Cyberbully Roles

- **Cyberbullies**
  - Entitlement bullies: "Put downers"
    - Individuals who think they are superior and the right to harass or demean others especially if the person is different.
    - Example: Mean Girls
  - Retaliators: "Get-backers"
    - They have been bullied by others and are using the Internet to retaliate.
    - see as righting wrongs; protecting friend/others
    - Example: Revenge of the Nerds & Vengeful Angel

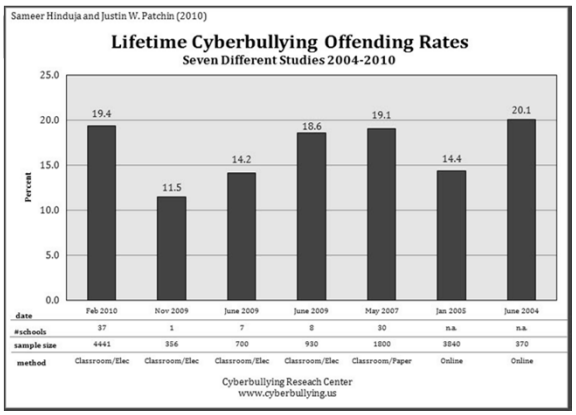
Prevalence of Cyberbullying

Reasons cyberbullies said they engaged in cyberbullying:

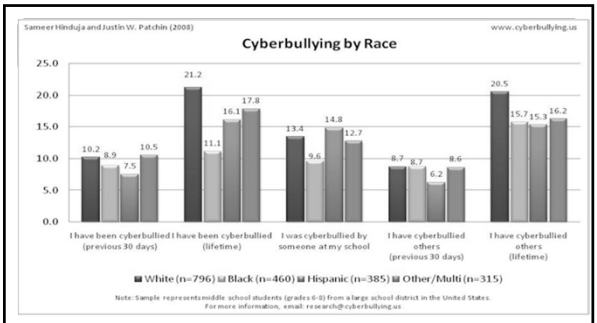
- To show off to friends (11%); To be mean (14%); To embarrass (21%); For fun/entertainment (28%); Person deserved it (58%); To get back at someone (58%); Something else (16%)

- Cyberbullies spend more time online
  - (38.4 hours compared to 26.8 hours)
- SNS users (39%) reported online harassment
- 81% of teens agree that bullying online is easier to get away with than bullying in person.

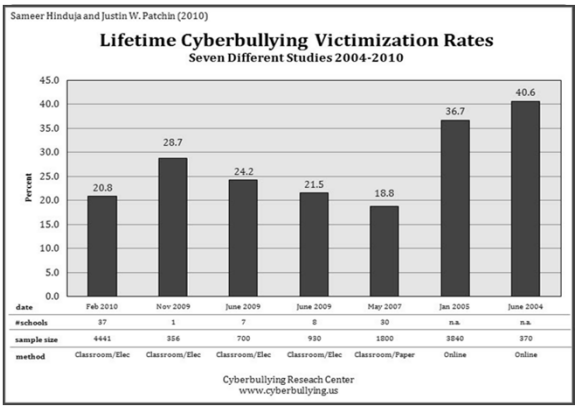
Moessner, 2007; Teen Online & Wireless Safety Survey, 2009



http://www.cyberbullying.us/research.php



All races are pretty evenly represented as victims or offenders.



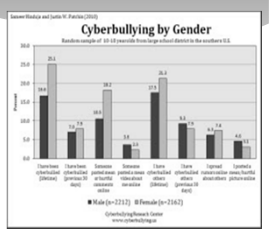
http://www.cyberbullying.us/research.php

Cyberbullying and Bystanders

* 45% of young people report that they see people being mean to each other on social networking sites (Gatti, 2008).

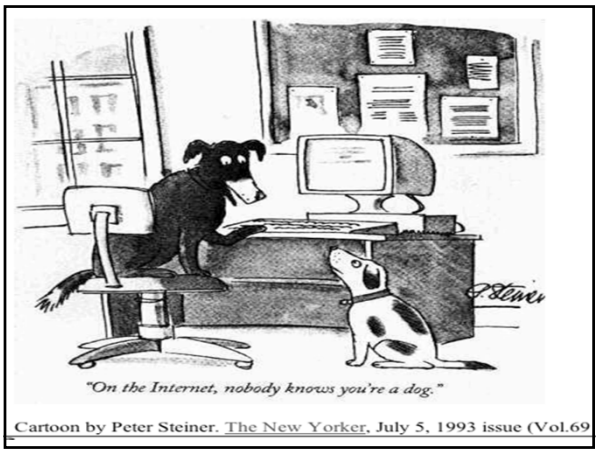
Cyberbullying by Gender

* Adolescent girls are significantly more likely than boys to have *experienced cyberbullying* in their lifetimes (25.8% vs. 16%) and report *cyberbullying others* during their lifetime (21.1% vs. 18.3%).
* Girls are more likely to spread rumors while boys are more likely to post hurtful pictures or videos.

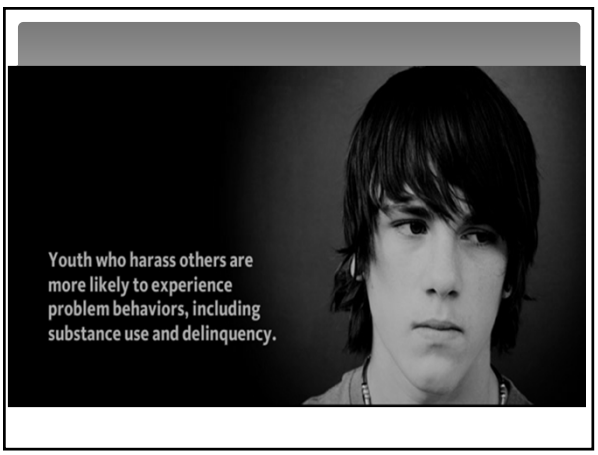


Why Cyberbully?

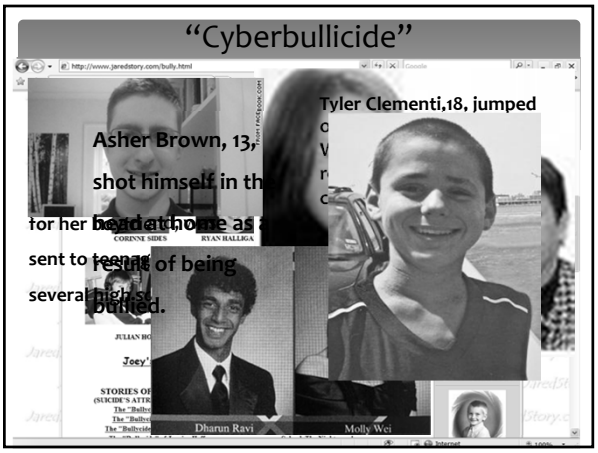
* ***You don't know me***
  * anonymity
  * experimentation with multiple identities
  * sense of entitlement
  * empowerment
* ***You can't see me***
  * illusion of invisibility
  * different moral values and social expectations
  * reduction of social and contextual cues and tangible feedback
  * underdeveloped empathy skills
  * instant gratification
* ***It's just a game***
  * entertainment – mass audience
  * lack of impulse control
  * underdeveloped an internal behavior control mechanism
  * ineffective problem solving skills



Cartoon by Peter Steiner. The New Yorker, July 5, 1993 issue (Vol.69



* **Physical, Social, Psychological, and Emotional**
  - Health concerns
  - Stopped socializing out of school
  - Fear, anxiety, anger, hurt, embarrassed
  - School failure, school avoidance, and school violence



Myth ALERT

Cyberbullying does not *cause* suicide

Technology Tools Used to Cyberbully

Signs of Cyberbullying Red Flags

A cyberbullying victim might

- Stop using the computer or cell phone
- Act nervous when receiving an e-mail, IM, or text
- Seem uneasy about going to school
- Withdraw from friends and family

Web 2.0 Tools - How familiar are you?

HB 1259: ACT 989 (2010): Cyberbullying

- Defined as: the "transmission of any electronic textual, visual, written, or oral communication with the malicious and willful intent to coerce, abuse, torment, or intimidate a person under the age of 18" according HB 1259.
- Fine: Not more than $500 and/or imprisoned up to 6 months or both.
- When the offender is under 17, the disposition of the matter shall be governed exclusively by the provisions of Title VII of the Children's Code.
  - Minors under 17: Must undergo counseling for a first offense and misdemeanor charges for secondary offenses (Children's code articles apply i.e., juvenile court intervention).

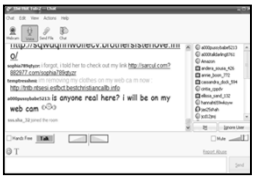
Web 2.0 Tools - How familiar are you?

Chat Rooms

* Chat rooms are places on the Internet where you can have live, real-time conversations with many people at the same time.
* Everyone in the chat room can see what everyone else writes, but you can still be as anonymous as you want.

Instant Messaging (IM)

* IM is a form of Internet communication that combines the live nature of real time chat with the personal contact of email. Benefits include:
* A safer environment than chat rooms since contact lists can be better controlled.



Ryan's secret IM Chat

RH = Ryan ; IMF = IM "friend"

RH (4:26:35 PM): i kno everything sux
RH (4:26:39 PM): i kno everything
RH (4:26:40 PM): sux
RH (4:26:48 PM): and this is gonna be the last time u hear me complain
RH (4:26:59 PM): its a song numnutz
IMF (4:27:24 PM): the last time i hear u complain?
IMF (4:27:31 PM): ur finally gonna kill urself?!
RH (4:27:35 PM): yep
IMF (4:27:36 PM): phew
IMF (4:27:40 PM): its about f--ing time
RH (4:27:46 PM): lol
RH (4:27:56 PM): you'll hear about it in the papers tomorrow

Source: Discovered by chance on Ryan's hard drive by his father

- ✓ Most IM software allows kids to block people they don't know
- ✓ Review contact lists for strangers
- ✓ Use the "Keep a history of my conversations" option

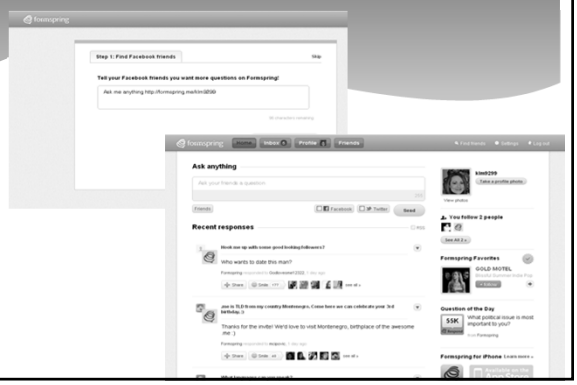
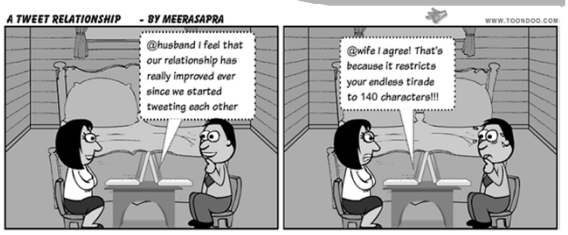
Formspring: The New Cyberscourge



Cyberbullying by twitter

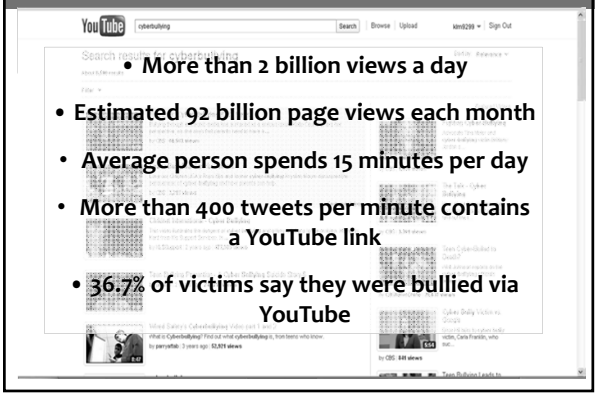


"Twitter is seeing a growing number of cyberbullying incidents as more and more kids figure out how to post hateful, harassing information about their friends and deliver it 'via Tweet' to as many followers of the site as they can."

Blog

- **A blog is basically a journal that is available on the web - the term is a shortened form of weblog.**
  - Updated daily using software that allows people with little or no technical background to maintain the blog.
  - Postings on a blog are almost always arranged in chronological order with the most recent additions featured most prominently.
  - Blogs usually include profiles, text, photographs, and links between "friends" and interests - and may include video or audio files.

Cyberbullying by Video Networking



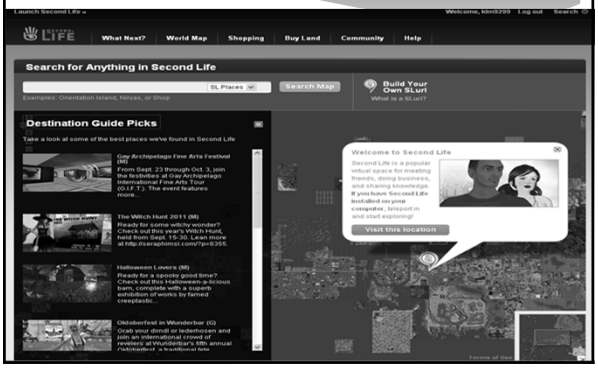
- **More than 2 billion views a day**
- **Estimated 92 billion page views each month**
- **Average person spends 15 minutes per day**
- **More than 400 tweets per minute contains a YouTube link**
- **36.7% of victims say they were bullied via YouTube**

Cyberbullying by

Stream live video fast to the world. Right from your phone.

- Trickery, Blackmail, Extortion
- Mobilization of gang violence or riots

Virtual Worlds
Second Life



Interactive Gaming

RPG's MMORPG (Massive Multiplayer Online Role-Playing Game)

- 27% of teens (12-17) play games with people they don't know online.
- Communicate by chat and live Internet phone with anyone they find themselves matched with in a game online.
- Kids verbally abuse the other kids, using threats and lewd language
- Lock others out of games, passing false rumors about them or hacking into their accounts.

Webcams

- Most big instant messaging services or those that allow voice over Internet protocol (VoIP) calling, such as Skype, allow both voice and video calling at little or no cost.
- Kids make videos of themselves and post on websites
- Express themselves on video blogs
- Hide out-of-sight to talk about another person(s) or spread rumors

"Spying" on You
Cell Phone Tapping

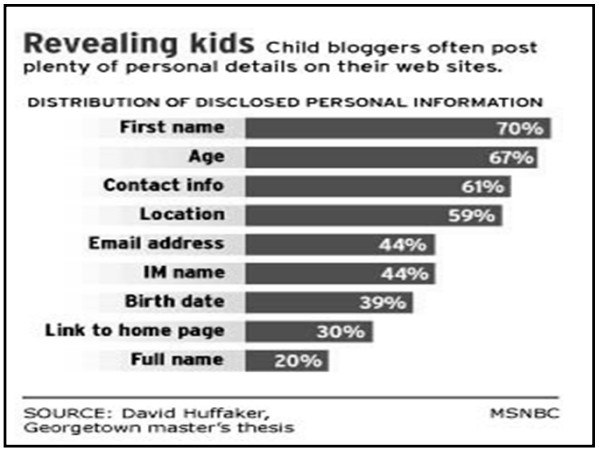
Cell phone can be secretly hijacked and used against you

Online predators seek kids who:

Ideal age: 11-15

- *Won't tell anyone
- *Spend a lot of time alone
- *Who are hurting
- *Whose parents are busy or separated
- *From troubled backgrounds
- *Young and vulnerable
- *Angry with their parents
- *Rebellious
- *Adventurous
- *Bored
- *No or little parental involvement
- *No definite bedtime
- *Can be away from home without anyone knowing where he/she is
- *Has exclusive use of the computer in a private area

"Characteristics of a Fictitious Child Victim: Turning a Sex Offender's Dreams Into His Worst Nightmare" by James F. McLaughlin.



Online Enticement

- Through use of chat rooms, e-mail, instant messaging, "blogs" and even on-line games, adult strangers can establish direct one-to-one access to children.
- "Distance" and children's natural trust can lead them to forget that these people are strangers … and many of them are very good at misrepresenting who they are.

Warning Signs That a Child May Be a Victim

- Child spending long hours online, especially at night.
- Phone calls from people you don't know.
- Unsolicited gifts arriving in the mail.
- Child suddenly turns off the computer when you walk into the room
- Withdrawal from family life.
- Reluctance to discuss online activities.
- By taking an active role in your child's Internet activities, you'll be ensuring that he or she can benefit from the wealth of valuable information the Internet has to offer, without being exposed to any potential dangers.

La Sex Offender Law (HB 55)

* Took effect on August 15, 2011.
* House Bill 55 was introduced into the House of Representatives by Rep. Ledrika Thierry, and **aims to stop some of Louisiana's registered sex offenders from accessing social media sites. The law bars offenders from "using or accessing" social networking sites, chat rooms and peer-to-peer networks.**
* If a registered Louisiana sex offender is now caught using these sites, they could be fined up to $10,000 and put in jail for 10 years for their first offense, and fined $20,000 for their second offense along with 20 years of jail time.

Investigating Predators

* **State Sex Offender Registry Website** entry point; contains links to additional resources relating to child pornography, kidnappings, and federal statutes.
  * www.fbi.gov/hq/cid/cac/states.htm
* **National Sex Offender Registry-** For a list with links, visit www.nsopr.gov

Social Network Communities

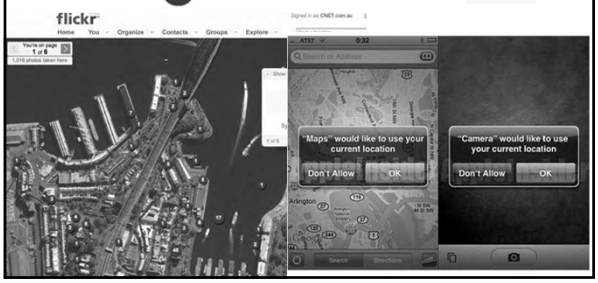
- Facebook, more than 500 million active users, an increase of 16.6% since in 2009; 145% increase since 2010.
- Users spend over 700 billion minutes per month on Facebook; over 200 million users access through their mobile devices.
- 74% of all 7th-12th graders say they have a profile on a SNS.
- 46% have open access to their online profile information.
- 62.0% of victims say they were bullied via SNS

ALL FOR FREE ..... BUT ....WHAT PRICE IS FREE ?

Geotagging (aka Facebook Add-ons)

The process of adding geographical identification to photographs, video, websites and SMS messages.

foursquare · Honesty Box · scvngr · Gowalla



Sexting

- The act of sharing flirtatious, nude or semi-nude photos via cell phone or other means of texting device.
- The list included acronyms like the always romantic
  - "DUM" ("Do you masturbate?"),
  - "FMLTWIA" ("F*** me like the whore I am")
  - "IMEWZRU" ("I am easy, are you?")

If They Must Post – Teach Them To . .

Absolutely ONLY positive personal/private information

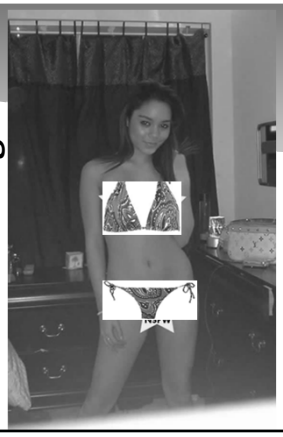
Vanessa Hudgens



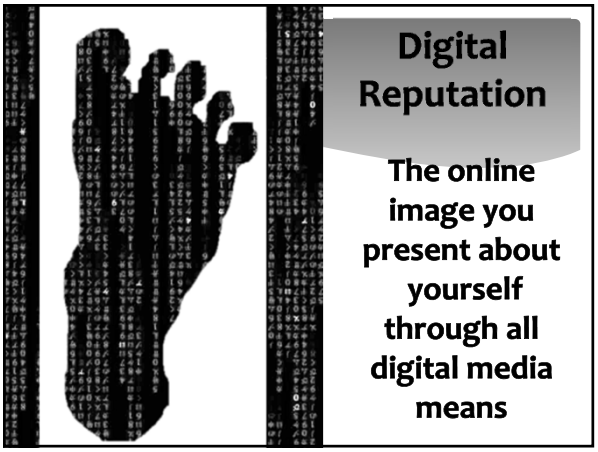
Why do Youth 'Sext'?

- 82.2% said to get attention
- 66.3% said to be "cool"
- 59.4% said to be like the popular girls
- 54.8% said to find a boyfriend
- Peer pressure (52%-Boys) (23%-Friend)
- Teen "romance" – expression of shared intimacy with partner
- Flirting or relationship currency
- Revenge after a breakup
- Blackmail
- Impulsive behavior
- Special present
- Joke
- Think it will remain private
- "Truth or Dare" (normative game gone very wrong)
- Bullying or intimidation ("pranks")

HB 1458: ACT 755 (2010): Louisiana Schools Accountability Law

- By January 1, 2011, public schools must conduct a review of the student code of conduct amend such code to assure that the policy prohibiting the harassment, intimidation, and bullying of a student by another student to include cyberbullying.
- Inform each student, in writing within 10 days, after enrolling in school of the prohibition against such incidents; the nature and consequences of such actions; and the proper process and procedure for reporting any incidents involving such prohibited actions.
- Develop and adopt a policy establishing procedures for the investigation of reports.
- Document the details of each reported incident of harassment intimidation, and bullying, including cyberbullying.
- Report all such documented incidences to the Department of Education

Sexting - Serious Consequences

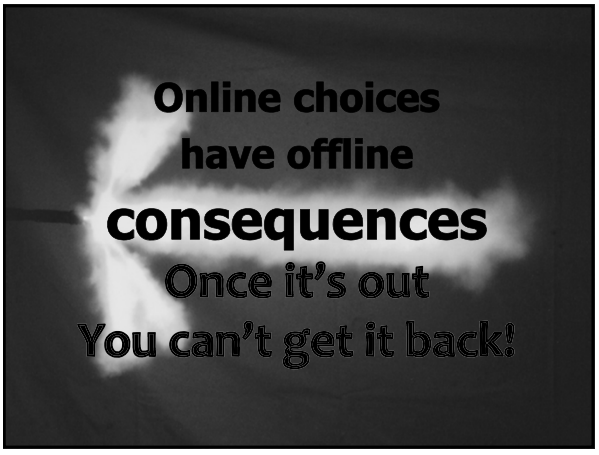


Digital Reputation

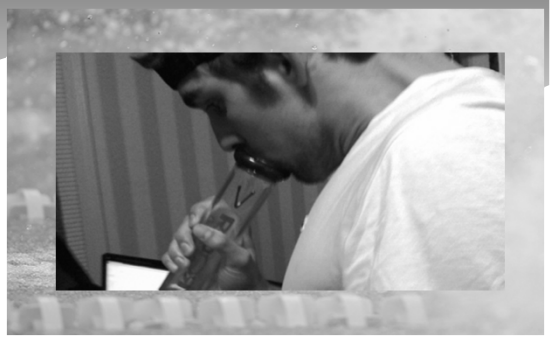
The online image you present about yourself through all digital media means

HB 1357: Act 993 (2010):"Sexting"

- It is a crime for anyone under the age of 17 to send an indecent visual depiction of himself/herself to another person via an electronic device.
- It is also a crime for a person under the age of 17 to possess or transmit an indecent visual image transmitted by another under the age of 17.
  - 1st Offense: fined $100-$200 dollars and/or imprisoned for 10 days (suspended with 16 hours of community service)
  - 2nd Offense: fined $250-$500 dollars and/or imprisoned for 10 - 30 days (suspended with 40 hours of community service)
  - 3rd Offense: fined $500-$750 dollars and/or imprisoned for 30 days-6 months (suspended with 80 hours of community service)



Michael Phelps



Will she get the job when her potential employer Googles her name?

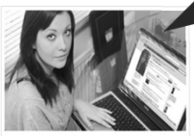
When Their Comments Can Get Them in Trouble?

Teenager fired for complaining about her job on Facebook.

March 1st, 2009 5:46 am PT

Like many teens, Kimberley Swann has a Facebook account. And like many teens, she also has a boring job which she often complained about. Her first mistake was writing up some of those complaints on her Facebook page.

Her second mistake was adding some of her new co-workers in as "friends", allowing them access to everything she had written. Apparently at least one of these co-workers found it necessary to pass on some of her comments to their boss, Stephen Ivell. And apparently Ivell didn't find her comments from her "first day at work. omg !! So dull" to other remarks about the menial



Kimberley Swann and her facebook page - I'm guessing she is now thinking before she writes anything now!

first day at work. omg!! So dull.

Google forced to reveal bully blogger's id
Placed pictures of Canadian model on 'Skanks' site
Matt Hartley, National Post
Published: Thursday, August 20, 2009
Punch the name Liskula Cohen into Google and the search engine turns up more than 130,000 hits.
Unfortunately for the Canadian-born fashion model, thousands of those results relate to offensive postings made about her by an anonymous cyber bully on a now defunct blog called "Skanks of NYC."
Now, after emerging victorious from a high-profile lawsuit against Google Inc., she knows the identity of that formerly anonymous blogger, and can begin planning her next move.
On Tuesday, New York Supreme Court Judge Joan Madden ordered Google to hand over the computer IP address and email address of the blogger to Ms. Cohen's lawyers.
Judge Madden said Ms. Cohen was entitled to confront the person who posted the defamatory comments.
In January, the 37-year-old Ms. Cohen sued Google after the search engine giant declined to provide her with the identity of the blogger who made five posts on the "Skanks of NYC" blog in August of 2008.

Develop a deeper understanding of kids':
online activities
Internet environments
use of the Net to explore roles and identity
Learn about the Internet by asking kids to teach you everything they know
Use the Internet environments and technological tools yourself

Protecting Our Children

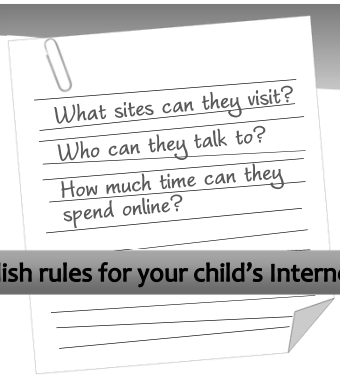
Talk to your Kids!
Learn about my online & offline life
Pay attention.
Focus on the purpose and value of online activity
Take action.

Word of Caution

Being rational or logical with adolescents may not work .. But try it!

What else YOU Can Do

* Provide *structure* and *rules* about being online:
  * Only after homework is complete;
  * On the average, for no more than 3 hours per day;
  * For the very young, all web sites must be parent approved before visiting;
  * "Report *any* suspicious activity"



Establish rules for your child's Internet use.

Dock all gadgets before bed in open area

How Parents Can Intervene

Preserve the Evidence Preserve evidence, as this is crucial for making a case and identifying the bully. 1	**Contact the Service Provider** Mobile phone operator Internet service provider Chatroom provider Usually there is an abuse team contact 2	**Supervise** Have the computer in a shared space Keep access to children's files Talk about their computer use Monitor behavior and mood Keep talking Promote responsibility-taking Provide scripts 3
Use Technology to Block Get savvy Use Spyware and anti-virus Use Blocking, a filtering technology if available, e.g. blocking user on IM and make sure blocking is up-to-date 4	**Work with Police** Death threats or threats of other form of violence to a person or property; Any evidence of sexual exploitation 5	**Work with School** Take Home School Agreements seriously Get in touch about concerns Support with incidents 6

Supervision & Restriction

- ✓ Children under 10 should not be surfing the Net alone
- ✓ Keep Internet-connected computers out of kids' rooms and in a highly visible area
- ✓ Tasks can't be performed effectively when multi-tasking
- ✓ No mental "downtime" to relax and reflect
- ✓ Kids with their own Internet connection spend twice as much time online

Teach Your Child How to Use Technology Responsibility

- **Teach Cyberethics**
- **Teach Chatroom Netiquette**
- **Think Before Posting**

Chatroom Netiquette

1. **Avoid Using ALL CAPS** - It's considered yelling.
2. **Decide What Tone the Conversation Has Before Posting** - Don't use offensive language or nicknames. Always avoid making personal attacks and calling names.
3. **Don't "Flood" the Chatroom** - Flooding is repeating messages over and over, or filling the screen with gibberish, in order to impede communication in the chatroom.
4. **Be Nice to Newbies** - Remember your first chats? If someone stumbles into your chat, who is obviously new to this medium, show some patience and help him or her get the hang of it.

Teach Them to Use Technology Responsibility

Character is what you do when no one is watching.

Think Before They Post

Use Technology Responsibility

Use Power Responsibly	• When you are online, you're in control. Don't spread rumors, take things (like music, movies, etc.) that don't belong to you, or forward spam e-mails.
Be Yourself	• Don't pretend to be someone you aren't while online.
Respect Other's Privacy	• Don't reveal secrets online or blab stuff like passwords, names, etc. This includes your own private information.
Don't Hurt Other's Feelings	• When you are online, people can't tell when you're joking. If you say or write something online, make sure you are clear if you are joking.
Respect other's Online Rights	• Just like offline, don't say mean things or make threats.
Don't respond if Someone Insults You	• It could be that they didn't think before they said it. But even if they meant to be insulting, don't make it worse. Just ignore it.

Data *Cannot* be Deleted

- Only share information in chat rooms that you want **everyone in the world** to know about
- Deleted pictures & information are ***NEVER*** gone and can be found years later
- Google your name often

Monitoring Programs

* Install *extra* security such as blocking, filtering, and key logging software.
  * Net Nanny
  * CyberPatrol
  * Safe Eyes
  * CyberSitter
  * PC Tattletale

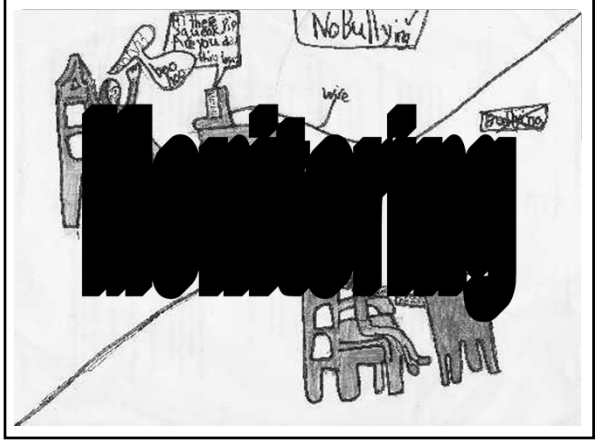
For Internet Filter Reviews visit
http://internet-filter-review.toptenreviews.com/?ttreng=1&ttrkey=internet+filter

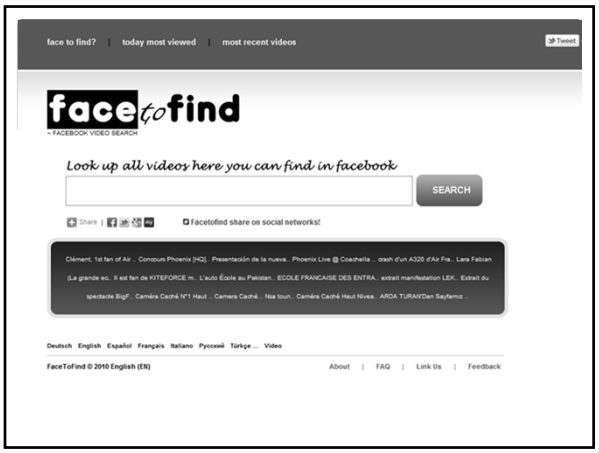
Intervention with Aggressor …

* STOP
  * Think about your personal values. What are your beliefs about the way others should be treated?
* THINK
  * About your reasons for bullying and alternative ways to express your feelings.
* DECIDE
  * Think about how your actions might affect others
  * What do you need now so that the harm can be repaired ?

TEACH THE AGGESSOR HE/SHE HAS A CHOICE!

CyberBully Alert – www.cyberbullyalert.com





Find everything about you online & **Protect** your personal data
Remove your personal information off people search databases and control your mailbox from unwanted mail with MyPrivacy. ($7.95/month)
